7 PRODUCTION MOBILE APPS SHIPPED | VERIFIABLE APP LINKS INCLUDED

PROFILE

Flutter developer with approximately two years of professional experience and contributions to shipping **7 production mobile apps**. Delivered workforce SaaS for South African clients and government applications, including offline synchronization, role-based workflows, API integration, an OpenAI RAG assistant and Google Play releases. Flutter/mobile delivery, offline workflows and AI-connected apps. Backend and ML depth is demonstrated through personal projects and a backend internship.

TECHNICAL SKILLS

Mobile: Flutter, Dart, GetX, Provider, reusable UI, Clean Architecture, MVVM/MVC, Firebase Cloud Messaging, ZegoCloud; Kotlin basics and Swift/iOS familiarity.

Offline / integration: Brick Offline First, SQLite, cached reads, queued writes, reconnect/custom server synchronization, REST APIs, API interceptors, RBAC and JWT.

Backend / real time: Node.js, Express, Python, FastAPI, MongoDB, Socket.IO and WebSockets; backend internship and personal full-stack projects.

AI / data: OpenAI APIs, retrieval-augmented generation, vector search; project-based TF-IDF/XGBoost categorization and recurring-payment detection.

Delivery: Git/GitHub, Postman, Android Studio, VS Code, debugging, performance fixes, Flutter SDK upgrades, Google Play publishing; Docker, AWS and GitHub Actions familiarity. Daily Codex / Claude Code use.

PROFESSIONAL EXPERIENCE

Software Engineer | LRM Technologies | Nov 2025 - Present

• Delivered and maintained Flutter SaaS and government apps; collaborated with senior developers on feature delivery, redesign and releases. Supported South African client workflows through the company's branch.

• Implemented Brick/SQLite offline workflows for quotes, invoices, payments and project data. Reworked dashboards, integrated REST APIs and resolved legacy Flutter/package/Gradle build issues.

• Worked on E-Filing, PlanMyCrew Team Lead/Admin and HRMIS, including an OpenAI RAG assistant grounded in three PDFs and Firebase push notifications.

Flutter Developer | SoftRawe | Feb 2025 - Oct 2025

• Contributed to two production Flutter apps across fintech and healthtech, translating requirements into UI and REST API integrations.

• Used reusable architecture, debugging, performance improvements, Git and collaborative code review.

Backend Python / Node.js Intern | Apexcify | Aug 2025 - Sep 2025 (concurrent internship)

• Worked on Python/Node.js REST APIs, MongoDB, JWT, validation, WebSocket messaging and automated data collection.

Flutter Developer | Zayan Enterprises | Oct 2023 - Apr 2024

• Designed UI/UX and built Flutter screens, integrated RESTful APIs, optimized GetX rebuilds and supported app publishing.

SELECTED PROJECTS

PlanMyCrew Team Lead | Production SaaS

Flutter, Brick/SQLite, REST APIs

Delivered offline workforce workflows for South African clients: quotes, invoices, payments, expenditure, projects and attachments; queued local writes and synchronized on reconnection. Reworked dashboards and resolved Flutter/Android compatibility issues.

Google Play: PlanMyCrew Team Lead

Balochistan E-Filing System | Production government app

Flutter, REST APIs; collaborative feature delivery

Contributed feature shipping and UI redesign with a senior developer. The app automates manual file workflows and lets departments forward and track files digitally.

Google Play: Balochistan E-Filing System

PlanMyCrew Admin | Production mobile app

Flutter/WebView; native Android/iOS controls

Worked on the mobile WebView app that presents the web admin panel while enabling native controls on Android and iOS.

Google Play: PlanMyCrew Admin

BSEDP | Production government project monitoring

Flutter, REST APIs, RBAC, FL Chart

Implemented 30+ screens and 30+ API integrations across four user roles, with multipart uploads, charts and PDF generation/download/viewing; supported Google Play release.

Google Play: BSEDP

S&GAD HRMIS | Production HR application

Flutter, OpenAI RAG, vector search, Firebase

Integrated an HR assistant grounded in three reference PDFs, retrieval-backed chat and Firebase push notifications.

Google Play: S&GAD HRMIS

Ping | Personal real-time mobile/backend project

Flutter, Node.js/Express, MongoDB, Socket.IO, ZegoCloud

Built direct/group chat, presence, message history and one-to-one video calls. Added JWT authentication, room membership checks and persisted messages.

https://github.com/abdulmuqeet8058/Ping-Complete-chatApp

AI Expense Tracker | Personal full-stack/ML project

Flutter, Python/FastAPI, MongoDB, TF-IDF, XGBoost

Built authentication, categorized finance views, filtering and monthly caching. Added ML expense categorization with confidence/corrections and recurring-payment detection using description similarity and timing.

https://github.com/abdulmuqeet8058/AI-Expense-Tracker

ADDITIONAL WORK & EDUCATION

JOY (production app): Flutter UI, API integration and publishing contribution at Zayan Enterprises. Google Play: JOY

TripMate (final-year project): Flutter, FastAPI and MongoDB; authentication, trip planning, route/budget/time inputs, history and API integration.

Other work: Easy Khata app-flavor configuration and UI; mobile social/weather projects; Python/scikit-learn rainfall research. More projects on GitHub.

BS Computer Science | BUITEMS | Dec 2021 - Jul 2025

Training: Flutter (Udemy / eHunar), Flutter internship and machine-learning certificate.
